

Project Development Phase

User Acceptance Testing (UAT)

Date	18th June 2026
Team ID	
Project Name	MediCareBook (Book a Doctor)
Maximum Marks	

Section 1: Project Overview

Project Name	MediCareBook (Book a Doctor)
Project Description	A MERN Stack clinical booking portal featuring custom Role-Based Access Control and administrator directory vetting.
Project Version	1.0.0
Testing Period	10th June 2026 to 17th June 2026

Section 2: Testing Scope

Verifies registration pathways, password cryptographic salting, patient doctor lookups, scheduling slot reservation, doctor dashboards approval queues, and global directory purges cascading deletes.

Section 3: Testing Environment

URL/Location	http://localhost:5173 (Vite Server) & http://localhost:8000 (Express Node Server)
Credentials	Patient: patient@test.com (pass123) Doctor: doctor@test.com (pass123) Admin: admin@test.com (pass123)

Section 4: Test Cases Table

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Patient Account Sign Up	1. Open signup form. 2. Input name, unique email, password. 3. Click signup button.	Account saves. Password is encrypted. Redirection to login.	Account created. BcryptJS salt verification verified. Redirected.	Pass
TC-002	Directory Category Filters	1. Login. 2. Open search directory. 3. Select category 'Cardiologist'.	Only vetted, approved doctors matching specialization display.	Cards filter immediately. Unvetted profiles hidden.	Pass
TC-003	Doctor Verification Flow	1. User applies. 2. Admin logs in. 3. Clicks approve toggle.	Doctor verification status updates. User role changes.	Directory state set to approved. DB role toggled to 'doctor'.	Pass
TC-004	Appointment Slot Booking	1. Select doctor profile. 2. Select date and slot. 3. Confirm scheduling.	Booking registers in ledger with status set to pending.	Record saved. Patient dashboard ledger lists slot as pending.	Pass

Section 5: Bug Tracking Table

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	Local storage session cache latency when admin approvals toggle user role to doctor.	1. Admin approves credentials. 2. User stays logged in but dashboard view is unchanged.	Medium	Resolved	Added route fetch hooks to reload browser session parameters.
BG-002	Orphan booking documents remain in collections after patient deletion.	1. Admin purges patient user. 2. Appointments collection still holds reference ID.	High	Resolved	Implemented Mongoose model pre-hooks executing cascades.

Section 6: Sign-off
